**NOTES**

This map is for use in determining the National Flood Insurance Program's flood insurance rates. It does not represent a warranty of accuracy, particularly for areas not shown on the map. The actual flood elevations shown may differ significantly from those developed by the National Weather Service for hydrologic engineering purposes.

Cross-sections and in Special Flood Hazard Areas may be obtained from flood control structures.

Boundaries of the floodway areas were determined by cross-sections and interpolated between cross-sections. The floodway areas were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Floodway widths are provided in the Flood Insurance Study Report.

Elevation reference marks are described in the Flood Insurance Study Report.

Coastal base flood elevations apply only to areas of 100-year flood.

Coastal base flood elevations shown on this map include the effects of wave action.

For additional map panels see separately printed Map Index.
